DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claim 1 is drawn to a personal authentication apparatus, classified in

Class 382 subclass 115.

II. Claim 2 is drawn to a locking apparatus, classified in class 70, and subclass 224.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a personal authentication, invention II has separate utility such a locking apparatus wherein lock driver configured to lock and unlock a door; and

a controller configured to make the lock driver unlock the door when the authentication unit authenticates a person. See MPEP. 806.05(d).

2. Because these inventions are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Mr. Hamburg on 10/10/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is reminded that upon the cancellation of claims to a non-elected

invention, the inventor ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR1.17(h).
